Advanced foam & Coating is someone I have used and recommended through out the years of trading in business. I have been in the truck body building business all my life and have owned my own for 25 years.

Alan is reliable and the quality of work is never doubted, he urethanes our truck floors and injection of tubing. We have never experienced any problems with shrinkage or any loss of foam from under our truck floors

We high recommend Alan and his team

**Frank Sellars
Managing director**
